class **Tests.PersonFileOperationTest** extends UnitTest.TestHelper

▶ **Inventory**

▶ **Summary**

▼ **Methods**

• method **TestMessageMapping()**

Tests the 'MessageMapping' XData for the operation. The first argument is the name of the operation, second is the request, and third is the expected method to be invoked for that expected message.

```
Do ..AssertMessageMapping("Operation.PersonFileOperation","DataModel.Person","WritePerson")
```
