class **Tests.SettingsTest** extends UnitTest.ProductionTestHelper

▶ **Inventory**

▶ **Summary**

▶ **Parameters**

▼ **Methods**

• method **TestPersonOperation()**

Tests the configuration settings for the 'PersonFileOperation'

1. Verify that the service is enabled
2. Verify that the pool size is set to 4
3. Verify that the file name is set
4. Verify that the file path set
5. Verify that the DSN is set
6. Verify that the output file is not overwritten

```
Set config = "PersonFileOperation"

Do ..AssertGeneralSetting(config, "Enabled", 1)
Do ..AssertGeneralSetting(config, "PoolSize", 4)

Do ..AssertSetting(config, "FileName", "People.csv")
Do ..AssertSetting(config, "FilePath", "/tmp/")
Do ..AssertSetting(config, "Overwrite", 0)
```

• method **TestPersonService()**

Tests the configuration settings for the 'LegacyPersonService'

1. Verify that the service is enabled
2. Verify that the pool size is set to 4
3. Verify that the query is in place
4. Verify that the key field name is set
5. Verify that the DSN is set
6. Verify that the credentials are set

```
Set config = "LegacyPersonService"

Do ..AssertGeneralSetting(config, "Enabled", 1)
Do ..AssertGeneralSetting(config, "PoolSize", 4)

Do ..AssertSetting(config, "Query", "SELECT * FROM External.LegacyData")
Do ..AssertSetting(config, "KeyFieldName", "ID")
Do ..AssertSetting(config, "DSN", "EXTERNALDB")
Do ..AssertSetting(config, "Credentials", "EXTERNALCREDS")
```
